## EDUCATION

- National Institute of Technology, Warangal** 2024 - 2028  
B. Tech in Computer Science and Engineering CGPA: 8.28
- Sri Chaitanya Junior College** 2024  
Board of Intermediate Education, Andhra Pradesh Percentage: 96.4
- Sri Chaitanya Techno School** 2022  
Secondary, CBSE (Class 10) Percentage: 98

## EXPERIENCE

- GirlScript Summer of Code (GSSoC 2026)** June 2026 - August 2026  
Open Source Contributor
  - Architected and integrated a modular, multi-stage RAG backend pipeline utilizing FastAPI and ChromaDB to enable high-precision semantic queries over customer review data.
  - Optimized context retrieval paths by implementing sentiment-aware metadata pre-filtering, multi-query expansion, and a Cross-Encoder re-ranking tier to minimize LLM token overhead and prevent response degradation.

## PERSONAL PROJECTS

- SkillLink Platform** Aug 2025 - Nov 2025  
Architected a high-throughput backend API for a freelancing marketplace with Roll-Based Access Control.
  - Tools & technologies used: Node.js, Express, MongoDB, Mongoose, Socket.io, JWT, Cloudinary, Nodemailer, REST APIs
  - Engineered a multi-role backend with dual-token JWT authentication (HttpOnly/Secure) to mitigate XSS/CSRF, alongside polymorphic MongoDB schemas managing complex contracts, bids, and media pipelines.
  - Implemented a real-time, room-isolated chat system via Socket.io, supported by a centralized error-handling framework and structured API response wrappers to guarantee reliable, full-duplex communication.
  - Streamlined media processing with robust file-upload pipelines and automated temporary-disk cleanup.
- High-Volume Esports Matchmaking & Telemetry System** May 2026 - June 2026  
Architected a FastAPI backend and 3NF database for real-time game matchmaking telemetry.
  - Tools & technologies used: Python, FastAPI, MySQL, asyncio, Connection Pooling, SQL Views, ACID Transactions
  - Designed a 3NF relational database with strict indexing and pre-compiled SQL Views, achieving sub-millisecond leaderboard aggregations and  $O(\log N)$  scaling under high-volume ACID transactions.
  - Developed an asyncio background simulation loop to continuously inject thousands of concurrent matchmaking records, mimicking live server load without blocking the main HTTP event loop.
  - Validated indexing efficiency and query execution paths using EXPLAIN ANALYZE on production-scale data.

## TECHNICAL SKILLS AND INTERESTS

**Languages:** C++, Java, Python, HTML, CSS, JavaScript, SQL (Oracle)

**Developer Tools:** VS Code, Git, GitHub, Postman

**Frameworks:** FastAPI, Node.js, Express, React, Tailwind CSS

**Cloud/Databases:** Oracle SQL, MYSQL, MongoDB

**Soft Skills:** Critical Thinking, Problem Solving

**Coursework:** Data Structures and Algorithms, Object-Oriented Programming (Java), Database Management Systems

**Areas of Interest:** Backend Software Engineering, Relational Database Design, Applied AI / Search Architectures

## ACHIEVEMENTS

- JEE Mains 2024:** Secured an All India Rank (AIR) of 2802 out of 1.4+ million candidates, placing within the top 0.2% nationwide. 2024
- LeetCode Competitive Programming:** Achieved a peak contest rating of 1987, ranking in the top 2.77% globally among active platform developers. 2026
